PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience building Python-based web applications and AI/ML solutions using Flask, TensorFlow, OpenCV, and Scikit-learn. Built full-stack projects in healthcare and agriculture, plus a MERN-stack property booking platform, with a strong interest in backend development and problem solving.

TECHNICAL SKILLS

Languages	Python, Java, C, JavaScript
Backend	Flask, FastAPI, REST APIs
Databases	SQL, PostgreSQL
AI / ML	Machine Learning, Scikit-learn, TensorFlow, PyTorch, OpenCV
Frontend	HTML, CSS, JavaScript, React
Tools	Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

PRANAWELL — AI-Powered Holistic Skin & Wellness Assistant

Python, React, PostgreSQL, OpenCV, Machine Learning

- Developed a full-stack AI wellness application connecting skin health with nutrition, hydration, exercise, and stress, using a Python backend, React frontend, and PostgreSQL database.
- Implemented AI-based skin image analysis using OpenCV and machine learning models to generate personalized wellness and lifestyle recommendations.
- Built hydration tracking, a wellness dashboard, and voice interaction. Student prototype; not intended for medical diagnosis.

KrishiAI — Crop Recommendation & Plant Disease Detection

Python, Flask, Scikit-learn, TensorFlow, OpenCV

- Developed a Flask web application that provides crop recommendations and plant disease detection from user inputs and leaf images.
- Trained and retrained a Scikit-learn crop recommendation model and integrated it into the web application.
- Implemented image-based plant disease detection with TensorFlow and OpenCV, served through Flask endpoints.

EXPERIENCE

AICTE – IBM SkillsBuild – BharatCares

Jun 2026 – Jul 2026

Generative AI & Cloud Computing Intern

- Completed a 6-week internship covering Generative AI and cloud computing fundamentals on the IBM SkillsBuild platform.
- Gained practical exposure to AI tools and workflows through hands-on learning activities.

Edunet Foundation – Microsoft – AICTE

Jun 2025 – Jul 2025

AI Azure Intern

- Built KrishiAI, a Python and Flask machine learning application, as the internship project.
- Applied Python and machine learning concepts to crop recommendation and plant disease detection.

Emertxe Information Technologies

MERN Stack Intern

- Built HomeLuHub, a property booking platform, using the MERN stack (MongoDB, Express.js, React, Node.js) as an internship project.

EDUCATION

Priyadarshini Institute of Science & Technology for Women

Expected 2028

B.Tech in Computer Science and Engineering

CGPA: 7.8/10

CERTIFICATIONS

- Python — NSDC
- Full Stack Development — Simplilearn
- Responsive Web Design — freeCodeCamp
- C — Udemy
- Introduction to Generative AI — Simplilearn in collaboration with Google Cloud

ACHIEVEMENTS

- Participated in hackathons and startup/innovation initiatives, gaining experience in rapid problem-solving, prototyping, and presenting technology solutions.
